**CHEATS taken from [dlh.net]**

Edit the file user.ini in the folder deusex/system and bind a key to a talkline. Use empty key binding and change it to X=talk (on all appearances, X can be any empty letter). Save and start the game and now press the selected letter and you will see a talk line beginning with SAY. Erase this SAY and type on the blank line: `set DeusEx.JCDentonMale bCheatsEnabled True`

Now the cheat mode is enabled and you might type in:
